

# NX

## MOVES YOUR HEART

NX 350h

DIGITALLY RENDERED IMAGE.

# LEXUS VISION MAKING LUXURY PERSONAL

Real luxury is never superficial, but thoughtfully considered and gracefully delivered. It feels engaging, exhilarating, and deeply personal. Not merely personalized in the sense of product features, but genuinely compassionate. It's expressed through imaginative technology that's both effortless and intuitive. It's Omotenashi that exceeds expectations, with heartfelt hospitality. And it's meticulous craft and refined elegance that captivate the senses. By making luxury personal, Lexus will authentically create happiness in motion.

Note: Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

# Design \_\_\_\_\_ LEXUS NX

## The front profile expresses the NX's originality

The Lexus NX design embodies originality and dynamism, with a taut, compact front profile featuring a lightweight Spindle Grille and signature 3-eye projector headlamps that emphasise a powerful, athletic stance.

At the rear, the distinctive L-shaped light bar combination lamps and Lexus logo create a sleek, modern identity.

## A cockpit based on the Tazuna Concept

Inside, the Tazuna Concept cockpit strengthens communication between driver and car with an intuitive layout that aligns displays and controls for effortless operation.

A 14-inch centre display integrates key functions with both touch and dial switches for ease, while meters and a colour head-up display ensure clear, driver-focused information.

Lighting that combines elegance with the spirit of 'omotenashi' hospitality

### Interior Illumination

Enhancing the experience, ambient interior illumination offers 14 theme colours and 50 customisable options, blending elegance with Lexus' spirit of Omotenashi hospitality to create an environment that is both refined and emotionally engaging.

# Driving Signature \_\_\_\_\_ LEXUS NX

## A smoothly accelerating 0.002487 m<sup>3</sup> Engine

### 0.002487 m<sup>3</sup> Engine

The 2.5 Litre in line 4-cylinder engine provides linear, smooth acceleration in response to the driver's acceleration operation. It realizes high-speed combustion through the use of high-efficiency intake ports to increase airflow in the combustion chamber. In addition, advanced technologies including multi-hole direct injectors, continuously variable-capacity oil pump, variable cooling system, and VVT-iE further contribute to powerful performance together with outstanding fuel efficiency and a high level of environmental performance.\*<sup>1</sup>

\*1 VVT-iE: Variable Valve Timing-intelligent by Electric motor.

Note: Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

## Body and mechanism: Contributing to outstanding ride comfort and smooth steering feel

### High-Rigidity, Lightweight Body

Frame section connections were reinforced and panel joints strengthened by various means, including expanding the area of joints, optimizing the application of bonding technologies and materials in different locations, and the use of high-rigidity foam material in the rear pillars. In addition, a twin hood lock construction design that uses the hood as a rigid member provides excellent front lateral flex rigidity, endowing the NX with exceptional body rigidity. Materials and manufacturing techniques were reviewed to reduce the weight of the body and outer panel parts, with a priority on higher parts to lower the center of gravity, to help suppress roll while cornering.

### Suspension (Front/Rear)

Lexus aimed for a composed steering feel with clear straight-line stability, and a flat, road-hugging posture. Suspension bushes feature low-torsion characteristics, while the shock absorbers reduce shock and vibration to deliver a quality ride. When turning, the suspension was engineered to yield a clear driving feel in response to steering inputs and broad, reassuring behavior at the limits. Additional enhancements that include high-rigidity/low-friction suspension characteristics, optimal axial force (friction) of the shock absorbers at very low speeds, and high roll rigidity, help realize a smooth, linear initial response to steering operation; a stable, visually appealing stance during cornering; and effective steering and stable control at the limits.

Dynamic performance that contributes to driving performance and a quiet cabin during high-speed driving

### **Aerodynamic Performance**

Development of the NX's aerodynamics focused on control technologies that utilize aerodynamic forces on the front, sides, rear and even under the floor to enhance driving performance. For example, the front bumper was shaped to generate longitudinal vortices to control the flow of air along the sides of the vehicle, while a flush belt molding helps generate a strong and stable vortex on the upper surface to regulate airflow, contributing to exceptional handling stability. Additional enhancements to control air flow across the vehicle include fins on the rear bumper to suppress turbulent airflow behind the rear tires, openings in the rear bumper to reduce up and down movement on the springs, and an engine under cover that contributes to excellent straight-line stability during high-speed driving.

## Quietness

Development of the NX focused closely on providing the exceptional quietness embedded in Lexus DNA.

### Enhancing Quietness While High-Speed Cruising

To reduce variations in noise levels due to varying vehicle speeds while driving, we focused on the low to mid frequencies which cause a high level of cabin noise. In addition, we implemented vibration-damping measures on panels such as the hood and side doors, which can vibrate noticeably because of fluctuations in air pressure during high-speed cruising.

### Enhancing Quietness During Wet Weather Driving

To realize a comfortable cabin space regardless of the driving conditions, measures to reduce the splashing noise during wet weather driving focused on areas around the tires and under covers.

### Hub Bolt Fastening Construction

Adopting a hub bolt fastening construction enhances high axle rigidity and reduces unsprung weight, contributing to a crisp steering feel with clear feedback and high-quality ride comfort. A black coating enhances the appearance of the wheels and ornamentation.

Note: Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

# Lexus Electrified \_\_\_\_\_ LEXUS NX

## Lexus Hybrid Drive: Responding to the driver's intentions

### Lexus Hybrid Drive

The 4th generation, large-capacity hybrid system combines a highly-efficient 0.002487 m<sup>3</sup> Engine (2.5 Litre) in line 4-cylinder engine with a high-output motor. It effectively combines a highly responsive engine, lithium-ion battery with enhanced battery performance, and hybrid system control with revised drive force characteristics to realize a high level balance between exhilarating driving performance and excellent fuel economy.

Specifically, the drive force characteristics were developed to deliver smooth and direct start-off/acceleration characteristics in the form of linear vehicle G force in response to accelerator operation, and a continuous acceleration feel at mid accelerator operation. It also provides cruising and following characteristics to easily maintain vehicle speed and distances between vehicles.

Lithium-ion battery

### E-Four

E-Four realizes stable driving performance by using the motor to drive the rear wheels when starting off or driving on slippery surfaces such as snow-covered roads. The front-rear power distribution is precisely controlled in ratios between 100:0 and 20:80 to provide excellent acceleration when starting off, and cornering stability in line with the driver's intentions.

# Advanced Safety \_\_\_\_\_ LEXUS NX

## Pre-Collision System: Anticipating a broad range of scenarios

The Lexus NX integrates advanced safety and driver-assist systems to anticipate risks and enhance confidence behind the wheel. Its Pre-Collision System uses radar and camera sensors to detect vehicles ahead and alert the driver of potential collisions, while Dynamic Radar Cruise Control maintains safe following distances and adjusts speed through curves for greater convenience.

Lane Departure Alert and Lane Tracing Assist work together to keep the vehicle centred and stable, even on gentle curves.

Note: Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

## Automatic high-beam control supports comfortable driving

### AHS (Adaptive High-beam System)

Night driving is supported by the Adaptive High-beam System, which precisely controls 12 LEDs in each headlamp to maximise visibility without dazzling other road users. The innovative E-Latch system replaces traditional latches with electronic controls, enabling smooth, one-touch door operation, complemented by additional safety features like Rear Crossing Traffic Alert and Rear Camera Detection, which monitor vehicles and pedestrians when reversing. Meanwhile, the Blind Spot Monitor provides clear alerts during lane changes, ensuring safer manoeuvres in traffic. Together, these technologies embody Lexus' focus on intelligent safety, convenience, and peace of mind.

Note: Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features. The system functions may not operate properly depending on the weather, road and vehicle conditions or other factors. Be sure to read the Owner's Manual carefully. Do not overly rely on these systems, as there is a limit to the performance they can provide. The driver is always responsible for paying attention to the vehicle's surroundings and driving safely.

## Realizing smooth, one-action door operation

### E-Latch

An e-latch system replaces the conventional door latch/unlatch mechanism with an electronic control that opens and closes doors smoothly with no wasted movements, like a sliding shoji paper door. To open a door when getting in, simply press the switch on the inside of the door handle while pulling the handle towards you in the usual way. When getting out, the door opens in a single action by pressing a switch while holding the pull handle.

### SRS Airbag System

The NX's SRS Airbag System includes front airbags, a driver's knee airbag, side airbags, and curtain shield airbags, providing comprehensive protection by cushioning impact and reducing injury in both frontal and side collisions.

# F Sport \_\_\_\_\_ LEXUS NX

Exclusive features including 50.8cm (20 inch) aluminum wheels, lower bumper spoilers, and front side garnish exude a sporting presence

- A: F Sport Emblem
- B: Fender Arch Moldings
- C: Grille
- D: Lower Bumper Spoiler
- E: Garnish
- F: Roof Rails (black)
- G: Exclusive 50.8 cm (20 Inch) Aluminum Wheels

Performance dampers and AVS (Adaptive Variable Suspension system) enhance exhilarating F SPORT driving performance

### Exclusive F Sport Tuning

F SPORT front and rear performance dampers quickly absorb flex and minute vibrations in the body while driving, to further sharpen handling characteristics, and enhance ride comfort and quietness. In addition, linear solenoid type AVS provides excellent damping force switching response. It contributes to shock isolation and a flat ride posture even on roads with large undulations and small rough areas, enhancing the excellent steering response and stability, while contributing to outstanding ride comfort.

## Heightening distinctive F SPORT individuality

### Exclusive F SPORT Interior

The F SPORT steering wheel, front seats, aluminum pedals, shift lever and exclusive enhancements boost sports driving control and enjoyment.

### Exclusive F SPORT Seats

The F SPORT seats are specially designed to provide the firm support required for exhilarating sports driving.

# Overtrail Grade \_\_\_\_\_ LEXUS NX

## NX Overtrail: Embark on new adventures in the great outdoors

- A: Front grille (bright black machined)
- B: Door mirrors (black paint)
- C: Door frame and door belt molding (black stainless)
- D: Roof rails (black)
- E: Outside door handles (black paint)
- F: 45.72 cm wheels

### Overtrail Grade Performance

The exclusive functionality of the Overtrail exterior design is complemented by enhancements for enjoying outdoor adventures. A higher body on the LDT (Light Duty Truck) provides extra ground clearance, AVS which controls damping force on all four wheels in response to driving operation and road conditions that integrates control of the AWD, braking, drive force and AVS, contribute to excellent driving and occupant comfort, especially when driving on rough surfaces.

## Enriching your outdoor lifestyle

### Overtrail Exclusive Exterior

The exterior design is coordinated with black elements to create a toned look. In addition, 45.72 cm tires and a higher minimum ground clearance than the standard specification improve its ability to tackle rough roads.

Overtrail exclusive body colour Moon Desert  
A special colour that emphasizes the three-dimensional effect with metallic shading and gives a feeling of high quality that is typical of Lexus.

Spindle Grille (matte black paint)

45.72 cm wheels (matte black paint)

Roof rail (black)

Door handle (black)

Door mirror (black painted garnish)

Door window frame molding (black)

## Overtrail Grade Interior

The interior of the Overtrail blends a refined premium quality with a distinct design, creating an elegant space for enjoying adventures. It is coordinated with a Monolith palette complemented by exclusive Geo Layer inspired by nature, shaping a luxurious outdoor experience that touches all five senses.

## Ornament Panel Geo Layer

The contrast of light and shade extracted from the natural colours of the earth and trees found in rare nature is used to express designs and textures that are both bold and delicate.

# Other Equipment \_\_\_\_\_ LEXUS NX

## Comfort features

### **Panoramic Roof**

A panoramic roof is available with opening/closing movable glass adopted for the front section. The roof construction has been changed from the current all-fixed glass to a construction with an outer sliding moveable glass for the front section (opening amount: 269.3 mm). The rear end of the panoramic roof has been extended to enhance the rear seat daylighting.

## A sound system delivering deep, sharp bass

### Mark Levinson Premium Surround Sound System

A Mark Levinson Premium Surround Sound (17 U Speakers) System is available, delivering high-quality sound reproduction worthy of a high-end audio system in all music genres. The Mark Levinson Premium Surround Sound System supports high-resolution audio to create a performance space that exceeds conventional CDs by reproducing the balanced and detailed expression of a live performance, such as the soft sounds produced by string instruments. The Mark Levinson PurePlay concept is used to achieve pure, distortion-free sound. Matching the heights of 7 Unity speakers and positioning them to surround the cabin creates the feeling of a live stage, with clear and unified mid-high range reproduction throughout the cabin. The system also features QLS (Quantum Logic Surround) sound technology to realize a precise stage feel, localization, and dynamic playback, and Clari-Fi compressed audio source reproduction technology to reproduce sound as close to the original as possible. A 25cm box subwoofer under the rear deck provides deep, crisp and loud bass.

## A cockpit layout focused on driving

### Shift Lever and Shift Knob

The shift lever is designed to provide a satisfying operating feel with gating that clicks sharply into position. With a short stroke and reduced peak load during shift operation, the lever feels light and easy to use. The shift knob was developed to provide the soft, moist feel of genuine leather, with a shape that is easy to grip and use.

### Center Console Features

With a 75mm diameter base, the cup holders can accommodate a range of cups and tumblers. With non-slip mats in the bottom, you can open plastic drink bottles with one hand while driving, without looking away from the road. Slide-open tray: The storage and charging tray integrated in the front of the center console features a simple slide opening, helping to minimize the eye movement required to access the tray, supporting focused concentration on driving. Double door console box lid: The lid is designed to provide easy access to the console box from both the driver's seat and the passenger's seat.

## A large, easily-accessible luggage space

### Luggage Space

The luggage space provides ample storage space with the rear seats up, and can be expanded as required by folding one or more of the rear seats down. Convenient side nets enable stowing of small items. Two lamps in the deck sides and one in the back door provide good illumination at night. In addition, a 3-way deck board that is easily folded with one hand, lets you change the layout to accommodate different sizes and amounts of luggage. The bifold design of the lightweight tonneau cover provides a wide opening for luggage, and enables easy folding and storage under the floor when not in use.

### Hands-Free Power Back Door

Even if both hands are full, when carrying the Electronic Key you can open and close the back door automatically by moving your foot under the rear bumper and out again. Refinements enhance fast, quiet operation, and a buzzer confirms when to move your foot out.

## Other equipment

### Drive Mode Select

Drive mode select provides integrated control of multiple systems, offering enhanced driving pleasure by allowing the driver to select drive modes to suit the situation and their preferred driving style. For models with AVS, drivers can select from Normal, Eco, Sport S, Sport S+ and Custom Mode. In addition, Custom Mode allows the driver to customize their preferred settings for the powertrain, AVS, EPS and air conditioning.

### Wireless Charging

Enables wireless charging of Qi-compatible smartphones and electronic devices simply by placing them on the charger tray.

# TAKUMI

Our Takumi craftsmen strive for perfection in every aspect of their work, actively seeking enhancements by applying constant care and dedication to their craftsmanship, blending their craftsmen's skills with the power of technology to better anticipate the future.

Every Lexus vehicle is created with a masterful skill and attention to detail inspired by both traditional artisanship and state-of-the-art engineering. For example, at the Tahara plant in Japan, precision components made using leading-edge digital technology are assembled and finished by master craftsmen called Takumi, whose technical expertise and sure senses are honed by decades of rigorous experience.

We seek innovation in every facet of engineering through a sophisticated fusion of seemingly incompatible ideas such as 'high performance yet high fuel efficiency'. In addition, unique Lexus styling is born of our L-finesse design language, a fine balance of 'Leading-edge' and 'finesse', which ensures every Lexus is not only captivating and luxurious, but also highly refined. Finally, every new Lexus model is also measured against a set of internal standards covering design, performance, specifications and equipment, to ensure it is distinctive and worthy of the Lexus emblem.

# CONNECTIVITY

Lexus Connect seamlessly integrates the NX and smartphone, offering remote access, real-time updates, and intelligent insights—all designed to enhance every drive with effortless convenience and control.

Note: Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.
